Joe WainerUpdated 2 months ago Frontline Commando is a third person shooter that sends players right into battle. Using familiar popular gameplay mechanics like destructible cover, high-powered weapons, and 3D graphics, Frontline Commando is an impressive shooter for mobile devices. Presented as a one-man army, Frontline Commando offers an experience very close to home consoles. The high quality graphics are impressive, containing smooth animations and outstanding effects. The game is like an action movie where players are given weapons and assigned missions to get revenge. Even with a lot of action on the screen, Frontline Commando does not suffer lag or glitches and is consistently challenging. The audio of the game also envelops players in the multiple environments and various enemy types with different sound effects. Frontline Commando’s controls are also very polished. Aiming is controlled by moving fingers around the screen with designated fire, reload, and cover movement buttons. There is also a duck button that serves as the reload when near an ammo crate. Include the various purchasable weapons and Frontline Commando’s gameplay can change rapidly.Various missions require players to eliminate all enemies, survive for a length of time, or even rescue innocent people in the warzone. The variety of missions keeps the experience fresh. Weapons are purchased with money earned through levels or in-game currency purchases. Some weapons and items can only be purchased with the in-game money.Frontline Commando is a great example of an excellent game using touch controls to manipulate the character onscreen. The experience of Frontline Commando is amazing because the game plays very smoothly.Frontline Commando is an excellent 3rd person shooter that gets quickly addictive. They are used for killing enemies and bosses, and are used to complete the missions and earn points. Weapons in Commando 2[] There are of 36 weapons a total in Commando 2, which are divided into 9 different categories, from A to I (pistols, machine guns, special weapons, etc.). two of the weapons - the Knife and the Barretti - are default weapons. Each weapon has its own magazine and amount of bullets. Most of the weapons are added during the first 6 missions. After accomplishing the game the Kee-Jerk Terminator and the Metal Driller will be available. The most powerful weapon in the game is the Dragon Destructor, while the least powerful weapon is the default handgun, the Barretti MC21. List of Weapons[] Main article: List of Weapons Trivia[] In Commando 2, weapons with an infinite ammunition actually have 999999999 rounds in their magazine. When their magazine reaches 999 rounds, the ∞ sign will be replaced with the actual magazine size. Weapons can be reloaded from ammunition boxes. It's a sort of cover-based arcade-style shooter, with a heavy emphasis on weapon and squad mate upgrading. Gamezebo's quick start strategy guide will provide you with detailed images, tips, information, and hints on how to play your best game.Quick Start GuideGetting StartedFrontline Commando 2 is available for free. Just click on the "Play Now" button up at the top there to get started.The typical Push Notification questions will greet you when you start it up, but even if you try to opt out you'll still get messages on your lock screen. So if you really want to avoid receiving notifications you're going to have to go into the options menu to shut them off.The in-game tutorial will then take you through the basics of combat - moving between cover, aiming, shooting, using scoped weapons, upgrading, assigning squad mates, and using squad mate special abilities.InterfaceFrom the main screen you'll see some basic information about your character and equipped weapons. The top of the screen displays the Energy Timer and your current Energy (needed for PvP), your current level and a progress bar that shows how much you need for your next level, your cash, and your gold (premium currency). You may tap on the "+" sign in the top-right corner to purchase more gold if desired.Options - represented by the gear icon. Allows you to adjust sound and Push Notification settings.Store - view and purchase weapons if you have the cash/gold.Squad - view the details of your squad mates, assign new soldiers, and train (i.e. upgrade) them.Social - view the Battle Log, Achievements, and Leaderboards.PvP - pit your squad against another player's for extra experience and cash, as well as leaderboard rankings. Note that you must complete the final stage in the first section of the solo campaign to unlock PvP.Campaign - shoot guys in the face, earn cash/items/gold/soldiers, and use your winnings to increase your odds in later levels and PvP. There's a maximum of three rewards you can earn in each level based on specific criteria. Note that you can still acquire cash from replaying levels, but you may only earn each reward once.CombatYou'll also have a few buttons to deal with when in combat. Along the top of the screen are the Pause button, your character's health, the level timer, and your currently-equipped weapon along with its current ammo. You may tap the weapon display to reload at any point.Swipe your finger around the screen to aim, and keep an eye out for those ever-present red barrels/Arrows - allow you to run between cover. Depending on your location you may only see one on the right or left side.Scope - will display in the bottom-left corner if using a scoped weapon. Tap to bring up the weapon and look through the scope. Note that you can tap the Scope button to pop out of cover and aim, which is much faster than popping out of cover first, then using the scope.Limited Use Items - grenades, drones, medkits, and rockets. Tap one of the icons to have your squad mates use the item in the area you're aiming (i.e. lob a grenade, fire a rocket, etc), or simply heal in the event of a medkit. These items aren't unlimited, however, so make sure you have some available before you try to use them.Cover - ducks in and out of cover.Fire - sprays bullets wherever you're aiming.Switch Weapons - cycle between the two weapons you have equipped. Note that switching weapons while reloading will reset the reload counter when you try to change back, as well as running between cover points.Tips and StrategiesDon't waste gold on promo packs, they're really not worth the gamble. Consider holding off on upgrading your starter weapons in favor of saving up for a machine gun and shotgun. Certain missions require the use of a specific weapon to earn all the rewards, and it's really not too difficult to push through the first several levels with low-end weapons.That said, don't forget to upgrade entirely. Each of the changes may be minimal, but they add up.Make liberal use of the Reload button (the weapon window in the top-right of the screen). Not only will it keep your clips full, but it will also make your character duck back behind cover. It's usually better than simply tapping the Cover button.Enemies who launch rockets or lob grenades tend to use them after switching cover, so if you see a rocket-using enemy run behind something get ready to move!Snipers won't take a shot at you until you see the lines from their laser sights hone in on you and become a dot. You'll have a clear shot at them until then.When buying weapons with cash, note that you can also opt to pay with gold. Weapons bought with gold, even the regular ones (no gold borders), can be upgraded a few levels higher. This means that, when fully upgraded, they'll always be stronger than weapons bought with cash.Don't be afraid to try the Elite missions. Sure they're super-tough and will most likely destroy you utterly, but the only thing you'll lose if you fail is maybe a minute of your time. Otherwise if you win you get some nice rewards!Congratulations!You have completed Gamezebo's quick start guide for Frontline Commando 2. ReviewsMarch 28, 2013By Joe Jasko Frontline Commando: D-Day is the latest 3D freemium action game from Glu Mobile, the makers of a number of hugely successful games that fit that same description, like Gun Bros. and Blood & Glory. D-Day is also a spiritual successor to 2011's Frontline Commando, which featured a much more modern setting and storyline than this World War II title. But in combining elements of traditional console games, with the fluidity and accessible nature of the mobile platform, Frontline Commando: D-Day is everything a handheld shooter should be. ReviewsApril 20, 2015By Tom Christiansen My experiences with over-the-shoulder shooters on mobile have been average at best. From the clunky controls of Brothers in Arms 3 to the all-around dull Overkill 3, I have yet to play a shooter that I've felt comfortable completely recommending to ... Frontline Commando 2 is the sequel to Frontline Commando developed by Glu Games. It is a freemium game, and uses in app purchases. The game is a shooter that involves online pvp and campaign and uses two virtual currencies: Cash and Gold. Gameplay[] Similar to Frontline Commando, Frontline Commando uses different buttons on the touch pad to move around, shoot, call air strikes, etc. What is new to the game is squads and new weapons. On the bottom right is where the fire button is located. The air strike, med pack, and other special abilities have been relocated to the bottom of the screen. The player's health is still located on the top left. Upgrading a weapon in the in-game store.Gameplay with the virtual buttons.The player takes cover in a timed mission. One new ability in the game is owning a squad. A player can earn squadmates from missions, or find them in a rare crate. During the battle, a player can command his or her squad to fire rockets, launch drones, heal the entire living squad, or throw a grenade. The player has a limited supply of rockets, drones, medpicks, and grenades, but they can be bought in the virtual store for ingame gold, earned in missions, or obtained with crates. In player versus player(or pvp) mode, players can attack other players while they are offline. When attacking, the defending player and his or her squad is controlled by the computer. The defending player can fire as many rockets, drones, and grenades as the AI wants without depleting the defending player's current supply. The defending player and his or her's squad only has to defeat the attack player to win, but the attacking player has to defeat the defending players entire squad. Plot[] You and your mercenary squad are hired by an organization called Eclipse. Previously you worked with a person named Roidegrrr(not Rodgers). Eclipse pays you and your squad to defend their complexes and attack their enemies. Defeating several bosses, you find out that Roidegrr has betrayed Eclipse and other merc squads attack you. Eventually, you will defeat all bosses and levels. Media[] Sound Effects[] Sign in to edit This page is a list of all weapons in the games of the Commando series.
