EmoteUniverse Discord Bot Described: Great and simple to use emote manager bot. I stand out for being reliable, efficient, and integrated with the latest discord features. I will provide you with the best experience. EmoteUniverse FAQ EmoteUniverse is an emoji manager bot that allows users to upload, manage, delete, and export custom emojis to create different emoji packs with ease. The bot also provides functionalities to non-Nitro users as it will convert messages with non animated emojis into animated ones. Additionally, it integrates the latest Discord updates, and now it can be used anywhere, such as in direct messages, group chats and even servers the bot is not in.Commands: (chat/slash)/help: Show the help embed with all comand list and their help description/invite: Generates an invite link for you to invite the bot or join the support server./status: Collets information about the hosting and conection status to discords sockets./add: Imports an external emoji to your server./export: Feches all the emojis to export to another server./import: Imports all the emojis from another server./list: Displays a list of all current emojis./remove: Removes an emoji from the server.User Context: (User profile applications)Add avatar as emoji: Creates an emoji from the users avatarUser Installs: (Use anywhere):/steal: Allows you to steal any emoji and copy it to your server with two simple clicksNitro Emojis:Profile Actions: Check out the home page for the full Discord Bot List. Frequently Asked Questions How do I add EmoteUniverse Discord Bot to my server? You can add EmoteUniverse to your Discord Server by pressing 'Add EmoteUniverse Discord Bot' on this page. More Discord Bots Tetra is a Discord bot project that greatly simplifies importing emotes from various services such as 7TV, BTTV, FFZ or direct links to sources onto your Discord server.The built-in automatic file optimization feature requires no additional action from users, and the optional scaling function allows you to adjust the emote to look its best.Additionally Tetra offers a few other smaller but equally exciting features, such as adding unavailable emotes directly from messages or reactions. git clone .env file and fill it with your credentials node_env: z.enum(["development", "production"]).default("development"), discordBotToken: z.string(), discordBotId: z.string(), oauthClientId: z.string(), oauthClientSecret: z.string(), inviteLink: z.string().url(), twitchClientId: z.string(), twitchSecretKey: z.string(), secretPhrase: z.string(), tenorApiKey: z.string(), imgurClientId: z.string(), DATABASE_URL: z.string().url(), PORT: z.number().optional(),Deploy global commands and push prisma schemanpm run deploy && npm run prisma:push To contribute, simply fork this project and create a pull request with your changes. Whether it's a new feature, bug fix, or documentation improvement, we appreciate all contributions. Thank you for your interest in helping to make this project even better!
