Simply use the Privacy Guide, a step-by-step tour of your privacy settings. Personalise your web browser with themes, dark mode and other options built just for you. Sign in to Chrome on any device to access your bookmarks, saved passwords and more. Use Chrome to save addresses, passwords and more to quickly autofill your details. Personalise your web browser with themes, dark mode and other options built just for you. Sign in to Chrome on any device to access your bookmarks, saved passwords and more. Use Chrome to save addresses, passwords and more to quickly autofill your details. From shopping and entertainment to productivity, find extensions to improve your experience in the Chrome Web Store. Access a world of knowledge at your fingertips. Check the weather, solve maths equations and get instant search results, all contained inside your browser's address bar. Get things done in Gmail, Google Docs, Google Slides, Google Sheets, Google Translate and Google Drive, even without an Internet connection. To install Chrome, simply download the installation file, then look for it in your downloads folder. Open the file and follow the instructions. Once Chrome is installed, you can delete the install file. Learn more about downloading Chrome here. Chrome is compatible with devices that run Windows and Mac operating systems, provided they meet the minimum system requirements. In order to install Chrome and receive adequate support, you must meet the system requirements. Learn more about using Chrome on your device. You can set Chrome as your default browser on Windows or Mac operating systems as well as your iPhone, iPad or Android device. When you set Chrome as your default browser, any link you click will automatically open in Chrome. Find specific instructions for your device here. Chrome uses cutting-edge safety and security features to help you manage your safety. Use Safety Check to instantly audit for compromised passwords, safe browsing status and any available Chrome updates. Learn more about safety and security on Chrome. Download Chrome on your mobile device or tablet and sign into your account for the same browser experience, everywhere. Get Chrome. Download Chrome Get Chrome for your phone Google Chrome is a fast, simple, and secure web browser, built for the modern web. Chrome combines a minimal design with sophisticated technology to make the web faster, safer, and easier. Google builds powerful tools that help you connect, play, work and get things done. And all of it works on Chrome. Is Chrome the fastest browser? Chrome, Firefox, Safari, and other major browsers are updated every few weeks, so it's hard to compare them over time which is the fastest. Chrome is known to be a RAM hog, but when used heavily, other browsers are known to be just as resource-consuming. In general, Chrome remains among the fastest browsers, especially for complex web apps and JavaScript-heavy sites. Web developers always optimize for Chrome's engine because it's the most used browser by far when you account for desktop use, Android phones, and all other browsers that also rely on the Chromium engine. Is Google Chrome safe and private? Google Chrome is generally considered safe in terms of protecting users from malicious websites, phishing, and malware, thanks to strong security features like sandboxing and phishing protection, but it's less private because it collects user data for Google services and ads. Everything you do in Chrome, including every character you type into the address bar, is recorded by Google and linked to you. While using other Google services, all that data may be cross-referenced. More privacy-conscious users may prefer to use Firefox. What are the best Chrome alternatives? There are tons of good and free alternatives for browsing the web. If you want a more private browsing, you can opt for Firefox or Brave. If you don't want to use Google services, you can use Ungogged Chromium, Opera, Microsoft Edge and Vivaldi are other great options, all three are Chromium-based just like Google Chrome. Why is Chrome using so much CPU and memory, even with only a few tabs open? Many users notice that Chrome consumes a significant amount of resources, even when only a few tabs are open. This is often due to certain tabs, extensions, or accumulated cache and cookies. To resolve this, open Chrome's Task Manager through the "More Tools" menu to identify and close tabs or extensions that are using the most resources. Disabling unnecessary extensions and regularly clearing your browsing data can also help improve performance and reduce memory usage. How can I prevent Chrome from automatically translating web pages? Chrome's automatic translation feature can be frustrating. To stop this behavior, go to the Settings menu, select "Languages," and turn off the option that offers to translate pages not in a language you read. You can also manage individual language preferences there. Features Speed Chrome is designed to be fast in every possible way: It's quick to start up from your desktop, loads web pages in a snap, and runs complex web applications fast. Learn more about Chrome and speed. Stay organized with tabs Tabs help you stay organized, keep track of multiple pages, and multi-task. You can group tabs together for better organization or pin tabs to automatically open websites you use the most. What's New The Chrome team is delighted to announce the promotion of Chrome 138 to the stable channel for Windows, Mac and Linux. This will roll out over the coming days/weeks. Chrome 138.0.7204.49 (Linux) 138.0.7204.49/50 Windows and Mac contains a number of fixes and improvements – a list of changes is available in the log. Watch out for upcoming Chrome and Chromium blog posts about new features and big efforts delivered in 138. Extended stable channel has also been updated to 138.0.7204.50 for Win/Mac Security Fixes and Rewards Note: Access to bug details and links may be kept restricted until a majority of users are updated with a fix. We will also retain restrictions if the bug exists in a third party library that other projects similarly depend on, but haven't yet fixed This update includes 11 security fixes. Below, we highlight fixes that were contributed by external researchers. Please see the Chrome Security Page for more information. [54000][407328533] Medium CVE-2025-6555: Use after free in Animation. Reported by Lyra Rebane (rebane2001) on 2025-03-30 [1000][40062462] Low CVE-2025-6556: Insufficient policy enforcement in Loader. Reported by Shaheen Fazim on 2023-01-02 [1000][406631048] Low CVE-2025-6557: Insufficient data validation in DevTools. Reported by Ameen Basha M K on 2025-03-27 We would also like to thank all security researchers that worked with us during the development cycle to prevent security bugs from ever reaching the stable channel. As usual, our ongoing internal security work was responsible for a wide range of fixes: [427296461] Various fixes from internal audits, fuzzing and other initiatives Many of our security bugs are detected using AddressSanitizer, MemorySanitizer, UndefinedBehaviorSanitizer, Control Flow Integrity, libFuzzer, or AFL.
