At Sol Distribution, our services go beyond merely the products provided. In fact, this is just a small facet of what we do. Our aim is to provide a superior service to everyone we work with and ongoing support which extends past the point of sale. We're so much more than just superior solar products. Sol Distribution is an Australian owned leading solar wholesaler focused on the distribution of residential and commercial solar photovoltaic products. We deliver quality, reputable solar brands coupled with superior customer service. We have established relationships with key suppliers and this ensures our supply and delivery is second to none. We pass on the benefits of our direct supplier relationships to our customers through our honest pricing. We know solar PV technology, end of story. We've been around for years and if it's solar, then we know about it. We offer a number of payment options and solar packages to ensure that we can meet every customer's need. Weighing only 17 kilograms, SMA's three-phase Sunny Tripower can be installed quickly while taking up minimal space. The Sunny Tripower can be commissioned quickly via a smartphone or tablet thanks to its integrated web interface. Discover SolarEdge's new inverter Wi-Fi solution, ensuring uninterrupted system monitoring after home router password changes for reduced support calls and site visits. It also offers extended Wi-Fi range by adding up to two SolarEdge repeaters. Sunny Tripower CORE1 is the world's first standing PV inverter for commercial rooftops, carports and ground-mount solar projects. The innovative new design offers up to 60% faster installation while delivering optimized total cost of ownership. More than an inverter. Discover now 100% ease and comfort with Sunny Boy 3.0-6.0 Maximum energy yields for private homes Thanks to its integrated web interface for easy commissioning via a smartphone or tablet and SMA Smart Connected service, this inverter offers true ease and comfort for PV system operators and installers. Good to know Smaller, simpler and more convenient with SMA Smart Connected. With its reduced weight, the Sunny Boy can be installed quickly while taking up minimal space. The Sunny Boy can be commissioned quickly via a smartphone or tablet thanks to its web interface. One-person installation due to low weight of 17.5 kg Compact design through minimum space requirements Quick installation thanks to external connections Intuitive commissioning and local monitoring via a smartphone or tablet SMA Smart Connected Investment security included With SMA Smart Connected, SMA offers free and automatic inverter monitoring that helps installers to provide customers with a quick, targeted service. If an inverter fails, SMA proactively informs the PV system owner and the installer. In this way, PV system owners and installers benefit from minimized diagnosis and downtime. If it is necessary to replace the inverter, SMA sends a replacement device fast and free of charge. SMA Smart Connected How it works During registration of the system in Sunny Portal, you, as the installer, activate SMA Smart Connected and thus start automatic inverter monitoring by SMA. SMA automatically checks the inverter for anomalies around-the-clock during operation. You and your customers benefit from SMA's many years of experience. After a fault has been diagnosed and analyzed, SMA informs the installer and PV system operator immediately by email. Everyone is thus optimally prepared for the troubleshooting process ensuring minimum downtimes and reducing outlay and costs. The regular power reports also provide the installer with valuable information about the overall system. If a replacement device is necessary, SMA automatically supplies a new inverter within one to three days of the fault diagnosis. As the installer, you can contact the PV system operator of your own accord and replace the inverter immediately. 1 Sunny Boy 3.0 - 6.0 SMA Smart Connected - the integrated service package 3 PV system monitoring via Sunny Portal / Sunny Places Easy commissioning via integrated WLAN and Speedwire interface Maximum transparency thanks to visualization in the Sunny Portal / Sunny Places Safe investment through SMA Smart Connected Modbus as interface for third-party providers Basic system functions Reduction in purchased electricity and increase in self-consumption through use of stored solar energy Maximum energy use thanks to forecast-based charging Increased self-consumption thanks to intelligent load control Easy integration of ripple control receivers via SMA Power Limiter With SMA Energy Meter Maximum system usage through dynamic limiting of feed-in to the grid between 0% and 100% Visualization of energy consumption Sunny Boy 3.0 / 3.6 / 4.0 / 5.0 / 6.0 Downloads Now the operating manual is also available as a Manual A reliable supply at all times Discover now Expand with additional battery power as needed Store solar energy The Sunny Boy Storage 3.7/5.0/6.0 is a high-performance SMA battery inverter for private homes. Larger storage systems are easy to implement and are flexible to expand with a total of three battery connections. Ideal for grid-connected systems Multistring battery connection: Connect up to three high-voltage batteries Learn more - Integrated Secure Power Supply function Fully automatic backup function for supplying electricity to the complete home (optional) The integrated service package SMA Smart Connected for automated monitoring of battery inverters Always optimally supplied with solar power - today, tomorrow and in the future Flexible System Design A PV system and the corresponding storage system is as unique as its user's power consumption and home. Whether the family is growing, an electric car needs to be recharged, the garage is being turned into a workshop - up to three connectable high-voltage batteries supply all loads even when the sun is not shining. A storage system makes you independent from conventional power companies and rising energy costs. Thanks to high-voltage technology, storage systems with the Sunny Boy Storage are particularly efficient and easy to install. To use even more self-generated solar energy in the home, an existing PV system can be expanded into a fully fledged storage system with just a few additional components. The operator further reduces the amount of electricity purchased from the grid and minimizes electricity costs. Thanks to multistring technology, up to three high-voltage batteries can be connected to the Sunny Boy Storage anytime. This allows the storage system to be expanded gradually and adapted to individual needs. Learn more Always up and running quickly with modern communications Simple handling Easy installation Fast commissioning due to integrated web interface Always informed thanks to direct connection to Sunny Portal / Sunny Places Web-based UI: Always up and running quickly with modern communications Reliable power supply - even in the event of a grid failure Reliable electricity supply Integrated Secure Power Supply provides electricity to individual loads manually from the battery even in the event of a grid failure Optionally with an automatic transfer switch for full power supply to the home from the battery and PV system on all three line conductors in the event of a grid failure Power in the battery - backup operation of up to 8 kW is sufficient for all standard loads 5-year warranty With the high protection class IP65, it can withstand even harsh ambient conditions and is therefore also ideally suited for outdoor installation SMA Smart Connected Investment security included With SMA Smart Connected, SMA offers free and automatic inverter monitoring that helps installers to provide customers with a quick, targeted service. If an inverter fails, SMA proactively informs the PV system owner and the installer. In this way, PV system owners and installers benefit from minimized diagnosis and downtime. If it is necessary to replace the inverter, SMA sends a replacement device fast and free of charge. SMA Smart Connected How it works During registration of the system in Sunny Portal, you, as the installer, activate SMA Smart Connected and thus start automatic inverter monitoring by SMA. SMA automatically checks the inverter for anomalies around-the-clock during operation. You and your customers benefit from SMA's many years of experience. After a fault has been diagnosed and analyzed, SMA informs the installer and PV system operator immediately by email. Everyone is thus optimally prepared for the troubleshooting process ensuring minimum downtimes and reducing outlay and costs. The regular power reports also provide the installer with valuable information about the overall system. If a replacement device is necessary, SMA automatically supplies a new inverter within one to three days of the fault diagnosis. As the installer, you can contact the PV system operator of your own accord and replace the inverter immediately. In the SMA Residential Solution, the Sunny Boy Storage temporarily stores electricity from the PV system in a battery. Combined with the Sunny Home Manager 2.0, energy flows in the home can be managed intelligently and electricity costs further reduced. Solar power can thus be used 24 hours a day. Battery inverter Sunny Boy Storage Intelligent energy manager Sunny Home Manager 2.0 PV monitoring with Sunny Portal / Sunny Places Battery inverter Sunny Boy Storage Intelligent energy manager Sunny Home Manager 2.0 PV monitoring with Sunny Portal / Sunny Places Sunny Boy Storage 3.7 / 5.0 / 6.0 Videos Always optimally supplied with solar power - today, tomorrow and in the future.
