

I'm not robot

Looking for enjoyable Spanish weather vocabulary practice exercises for your students? This post offers a variety of free resources, including writing activities, a weather report project, and digital versions to download and use with your Spanish weather unit. Perfect for middle school and high school novices! Here's a list of essential Spanish weather conditions vocabulary: *qué tiempo hace hoy* - what is the weather like today? *está nublado* - it is cloudy *está nevando* - it is snowing *está lloviendo* - it is raining *está soleado* - it is sunny *hace fresco* - it is cool *hace calor* - it is hot *hace frío* - it is cold *hace sol* - it is a sunny day *hay sol* - it's sunny *hay tormenta* - there's a storm *hace viento* - it's windy *hay viento* - it's windy *grados* - degrees *la temperatura* - the temperature *lueve* - it rains *la lluvia* - the rain You'll notice that some of these phrases are similar, and word choice may vary from region to region. In your Spanish weather unit, you might also want to explore seasons vocabulary. Here's a short list: *la primavera* - spring *el otoño* - autumn *el invierno* - winter *el verano* - summer Ask students about their favorite season, and have them describe the weather and activities they enjoy! These Spanish worksheets include engaging activities like a mystery puzzle, partner speaking exercise, human bingo, listening activity, and more. Digital versions are also available to suit your teaching needs. Download the maze weather worksheet for students to practice identifying common weather phrases. An answer key is included for self-correction, as well as a digital version for Google Slides. The Spanish weather worksheet pack includes a word search, crossword, writing practice, and digital versions for Google Slides. Use the printable worksheets or digital versions - whichever works best in your classroom! The Spanish weather vocabulary dictation set offers listening, reading, and writing practice all in one review activity. Print and hang the sentences for running dictation, or use the included audio file to let students work individually. In the Spanish weather report project, students will explore Spanish-speaking countries while reviewing weather expressions. This digital project includes 21 countries, 21 cities, and more! They connect geography and the Spanish language. This is a flexible weather report project for vocabulary your students have been working on. They will look up the forecast using any website, gather it into their map, and create their final project. This small talk resource can help you add Spanish weather vocabulary to your daily routine. Start each class with a check in, calendar talk, and talking about the weather with your students for an easy way to cover each expression throughout the school year. Looking forward to exploring the weather with your little one using this comprehensive 9-page workbook of weather printables in Spanish, which also includes a weekly chart to get out of the house. This workbook is designed for Pre-K to first grade students and features 16 Montessori-style weather flashcards in Spanish to introduce basic weather vocabulary. Additionally, you'll find a free winter printable activities section that offers various ways to use these flashcards, such as creating a print-rich environment, playing memory games, and using them for sequencing and pattern practice. You will receive a six-page workbook to work with your child's new Spanish weather vocabulary, including weather flashcards. The first page involves talking about the weather on weekdays (lunes to viernes) and matching the correct clip art to the corresponding day of the week. This activity helps memorize different weather words while learning days of the week. On another page, it is raining, and your child needs to color or circle the clothes they should wear in that weather. You will also discuss why certain clothes are chosen for rainy weather and what activities can be done during rain. The third page involves counting clouds and writing numbers, as well as discussing favorite weather types and what clothing is worn during those times. Children then draw a picture of a fun memory in their preferred weather type. Some pages also include forecasting patterns to identify and match. To access these workbooks, you can purchase them on Etsy for \$7.97 or just the weather flashcards for \$3.97. Additionally, subscribing to your blog provides free printables and bilingual parenting advice every two weeks. Students can tackle this worksheet alone or with a partner to solve the exercises. To complete it, they need to select words from a list that match each weather condition depicted in illustrations. For another task, students simply insert Spanish vocabulary related to weather and natural disasters into provided blanks. The second part involves describing recent changes in the weather with their partner using their own expressions or those from the worksheet. Students work together to describe current and past weather conditions in Spanish. They can use words from the worksheet or develop their own phrases to convey how the weather has changed over time. Learning these vocabulary words through worksheets, games, and interactive activities is a great way to understand weather forecasts. Printable materials like writing exercises, bingo, and more are available for free. The worksheets and games are suitable for young learners in kindergarten, students at school, or homeschooling environments. For beginners, you can choose from collections like "Weather for Beginners" that offer smaller sets of vocabulary words such as "sunny," "cloudy," "rainy," "snowing," "windy," "hot," and "cold."
